VersaSeal® Announces New Canadian Stock Check

Montrose, AL. VersaSeal has introduced a new stock check that meets imageability requirements as outlined by the Canadian Payments Association.

VersaSeal, a patented pressure seal solution available to distributors and resellers, announced this open format check product is now available for immediate shipment. The 11" Z-Fold check features a blue/green prismatic pantograph, microprint border, padlock icon and Canadian endorsement backer. Bilingual opening instructions are included on the check.

Samples and pricing information can be obtained by calling the VersaSeal hotline at 1-866-837-7273.

According to Brand Manager, Deanna Day, many customers have been requesting guidance on Canadian check imageability requirements. "The Canadian guidelines present a new set of challenges to the financial forms provider. We have the software and testing ability to insure our products are compliant and meet the mandated standards of the CPA. In addition to our stock VersaSeal product, we can also provide custom solutions in cut sheet, continuous, and unit set formats."

VersaSeal, a trade only mailing solutions provider, is a market leader for pressure seal products.
